

WITH YOUR SUPPORT WE...

EXTENDED OUR GLOBAL REACH

We welcomed our seventh Prematurity Research Center, and first in Europe, at the **Imperial College London** to find the causes of prematurity and develop lifesaving solutions.

DEVELOPED A NEW WAY TO PREDICT PREMATURE BIRTH

Researchers developed a blood test that accurately identified **75 to 80 percent** of pregnant women who would deliver babies up to two months prematurely.

DEMANDED #BLANKETCHANGE

To address the **700 women** who die from pregnancy complications each year, we launched **#BlanketChange** to persuade policymakers to pass laws and regulations that promote the health of women and babies.

RENEWED OUR COMMITMENT TO MOMS AND BABIES

We offered information and comfort to more than **45 THOUSAND** families with our NICU Family Support® program and our My NICU Baby™ App.

CREATED NEW SUPPORT NETWORKS FOR MOMS

Our Facebook Mentorship program and Wall of Remembrance connected moms to resources and support. We continue to work to change public policies through initiatives like our Gretchen Carlson Advocacy Fellowship.
